Only material or significant changes from the Annual Statement have been updated for all other notes, or portions thereof.

1. Summary of Significant Accounting Policies

- A. Allstate Life Insurance Company (the “Company”) prepares its financial statements in conformity with accounting practices prescribed or permitted by the Illinois Department of Insurance (“IL DOI”). Prescribed statutory accounting practices include a variety of publications of the National Association of Insurance Commissioners (“NAIC”), as well as state laws, regulations and general administrative rules. Permitted statutory accounting practices encompass all accounting practices not so prescribed.

The State of Illinois requires its domestic insurance companies to prepare financial statements in conformity with the NAIC Accounting Practices and Procedures Manual (“APPM”), which includes all Statements of Statutory Accounting Principles (“SSAPs”), subject to any deviations prescribed or permitted by the IL DOI.

The Company’s net income and capital and surplus did not include any accounting practices prescribed or permitted by the IL DOI during 2017 and 2016.

C. Investments

Loan-backed and structured securities (“LBASS”) with an NAIC designation of 1 through 5 are reported at amortized cost using the effective yield method. LBASS with an NAIC designation of 6 are reported at the lower of amortized cost or fair value, with the difference reflected in unassigned surplus as unrealized capital loss. In general, LBASS utilize a multi-step process for determining carrying value and NAIC designation in accordance with SSAP No. 43R, *Loan-backed and Structured Securities*. For LBASS that are purchased with high credit quality and fixed interest rates, the effective yield is recalculated on a retrospective basis. For all other LBASS, the effective yield is recalculated on a prospective basis.

- D. Based upon its evaluation of relevant conditions and events, management did not have substantial doubt about the Company’s ability to continue as a going concern as of March 31, 2017 or December 31, 2016.

5. Investments

A. Mortgage Loans, including Mezzanine Real Estate Loans

1. The minimum and maximum lending rates for new mortgage loans in the first three months of 2017 were 4.06% and 4.84%. The minimum and maximum lending rates for new mortgage loans in 2016 were 3.17% and 5.50%. All new mortgage loans were commercial.

D. Loan-Backed Securities

1. Prepayment assumptions for LBASS were obtained from external sources and internal estimates.

NOTES TO FINANCIAL STATEMENTS

2. The following table presents the aggregate amortized cost of LBASS before recognized other-than-temporary impairment (“OTTI”) adjustments, the amount of OTTI adjustments recognized and the fair value of those securities.

NOTES TO FINANCIAL STATEMENTS

4. Unrealized losses are calculated as the difference between amortized cost and fair value. They result from declines in fair value below amortized cost and are evaluated for OTTI adjustments. Every LBASS with unrealized losses was included in the portfolio monitoring process.

The following table summarizes gross unrealized losses and the fair value of LBASS by the length of time these individual securities have been in a continuous unrealized loss position.

(in millions)		March 31, 2017	December 31, 2016
a. The aggregate amount of unrealized losses:			
	1. Less than 12 months	\$ (4)	\$ (7)
	2. 12 months or longer	\$ (44)	\$ (44)
b. The aggregate related fair value of securities with unrealized losses:			
	1. Less than 12 months	\$ 201	\$ 294
	2. 12 months or longer	\$ 178	\$ 223

5. As of March 31, 2017, the aggregate amount of unrealized losses related to LBASS was \$48 million. Of the \$48 million of unrealized losses, \$41 million were related to investment grade LBASS. Investment grade is defined as a security having an NAIC designation of 1 or 2, a rating of Aaa, Aa, A or Baa from Moody's, a rating of AAA, AA, A or BBB from S&P Global Ratings, a comparable rating from another nationally recognized rating agency or a comparable internal rating if an externally provided rating is not available. Market prices for certain securities may have credit spreads which imply higher or lower credit quality than the current third party rating. Unrealized losses on investment grade securities were principally related to an increase in market yields which may include increased risk-free interest rates and/or wider credit spreads since the time of initial purchase.

As of March 31, 2017, the remaining \$7 million of unrealized losses were related to below investment grade LBASS. Of the \$7 million of unrealized losses related to below investment grade LBASS, \$2 million of unrealized losses were related to securities with an unrealized loss position less than 20% of amortized cost, the degree of which suggests these securities did not pose a high risk of being other-than-temporarily impaired. The remaining \$5 million of unrealized losses related to below investment grade LBASS with an unrealized loss position equal to or greater than 20% of amortized cost and have been in an unrealized loss position for a period of twelve months or more. Unrealized losses on below investment grade LBASS were the result of wider credit spreads resulting from higher risk premiums since the time of initial purchase. These wider spreads were largely due to the risk associated with the underlying collateral supporting certain LBASS.

LBASS in an unrealized loss position were evaluated based on actual and projected collateral losses relative to the securities' positions in the respective securitization trusts, security specific expectations of cash flows and credit ratings. This evaluation also takes into consideration credit enhancement, measured in terms of: (1) subordination from other classes of securities in the trust that are contractually obligated to absorb losses before the class of security the Company owns; (2) the expected impact of other structural features embedded in the securitization trust beneficial to the class of securities the Company owns, such as overcollateralization and excess spread; and (3) for certain LBASS in an unrealized loss position, credit enhancements from reliable bond insurers, where applicable.

As of March 31, 2017, the Company had not made a decision to sell and it was not more likely than not the Company would be required to sell these securities with unrealized losses before recovery of the amortized cost basis. As of March 31, 2017, the Company had the intent and ability to hold LBASS with unrealized losses for a period of time sufficient for them to recover.

E. Repurchase Agreements and/or Securities Lending Transactions

I. Working Capital Finance Investments

The Company did not hold working capital finance investments as of March 31, 2017 or December 31, 2016.

J. Offsetting and Netting of Assets and Liabilities

None of the Company's derivative or securities lending transactions contain a valid right to offset assets and liabilities per the requirements of SSAP No. 64, *Offsetting and Netting of Assets and Liabilities*. The Company did not enter into repurchase agreements, reverse repurchase agreements or securities borrowing transactions.

M. Short Sales

The Company did not have short sale transactions as of March 31, 2017.

N. Prepayment Penalty and Acceleration Fees

The following table provides the number of CUSIPs sold, disposed or otherwise redeemed and the aggregate amount of investment income generated for bonds, including LBASS, sold, redeemed or otherwise disposed of as a result of a callable feature for the three months ended March 31, 2017:

10. Information Concerning Parent, Subsidiaries, Affiliates and Other Related Parties

- A.,
B. &
C. Transactions with Allstate Short Term Pool, LLC ("Short term pool")

Commencing in the third quarter of 2016, the Company invested in the Short term pool, which is offered by the Allstate Short Term Pool, LLC to certain wholly-owned affiliated companies of The Allstate Corporation (the "Corporation"). The Short term pool is an investment pool managed by Allstate Investment Management Company, an affiliate of the Corporation, whose purpose is to efficiently manage cash and cash equivalents for its member companies. Each member company has an undivided interest in the underlying assets of the Short term pool maintained at a stable net asset value and unit price in proportion to the member's Membership Percentage, as defined in the Operating Agreement of Allstate Short Term Pool, LLC. The fair value of the underlying assets of the Short term pool are monitored daily. All income, gains, losses and deductions of the Short term pool are allocated among the member companies based on the member's Membership Percentage. As of March 31, 2017 and December 31, 2016, the Company's investment in the Short term pool was \$170 million and \$112 million, respectively.

Transactions with Allstate Insurance Company ("AIC")

The Company paid dividends totaling \$300 million to its parent, AIC, in 2017. See Note 13, Part 4 for details.

Transactions with the Corporation

On March 14, 2017, the Company borrowed \$311 million from the Corporation in accordance with the Amended and Restated Intercompany Liquidity Agreement ("Liquidity Agreement"), which was repaid in full, including interest expense of \$151 thousand, on March 30, 2017.

Transactions with ALIC Reinsurance Company ("ALIC Re") and Kennett Capital, Inc. ("Kennett Capital")

Effective January 1, 2017, with South Carolina Department of Insurance ("SC DOI") approval, surplus notes issued by ALIC Re to the Company with par value totaling \$325 million, plus \$1 million of accrued interest were repaid. Upon repayment of the surplus notes from ALIC Re, the intercompany note agreement between the Company and its affiliate, Kennett Capital, in the amount of \$325 million par was terminated, including settlement of \$1 million of accrued interest received by the Company. The details of this transaction are described in Note 21, Part C.

There were no other transactions entered into by the Company with related parties in 2017 that involved more than 1/2 of 1% of the Company's admitted assets. Activity resulting from reinsurance agreements, insurance contracts or cost allocation transactions in accordance with intercompany agreement provisions was excluded.

11. Debt

- B. The Company did not hold capital stock of the Federal Home Loan Bank or have funding agreements or borrowing arrangements with this entity as of March 31, 2017 or December 31, 2016.

12. Retirement Plans, Deferred Compensation, Postemployment Benefits and Compensated Absences and Other Postretirement Benefit Plans

- A. 4. The Company was not a sponsor of defined benefit pension, other postretirement, or special or contractual termination benefit plans.

13. Capital and Surplus, Dividend Restrictions and Quasi-Reorganizations

4. On March 15, 2017, the Company paid an ordinary cash dividend of \$300 million to AIC. The Company did not pay dividends in 2016.
10. Cumulative unrealized gains and losses increased unassigned funds by \$801 million and \$710 million as of March 31, 2017 and December 31, 2016, respectively.

NOTES TO FINANCIAL STATEMENTS

16. Information about Financial Instruments with Off-Balance-Sheet Risk and Financial Instruments with Concentrations of Credit Risk

Derivative financial instruments

1. The following table summarizes the notional amount of the Company's derivative financial instruments, including those with off-balance-sheet risk:

	(in millions)			
	Assets		Liabilities	
	March 31, 2017	December 31, 2016	March 31, 2017	December 31, 2016
a. Swaps	\$ 316	\$ 378	\$ 119	\$ 39
b. Futures	3	-	-	-
c. Options	44	46	-	-
d. Total	\$ 363	\$ 424	\$ 119	\$ 39

The notional amounts specified in the contracts are used to calculate the exchange of contractual payments under the agreements and are generally not representative of the potential for gain or loss on these agreements. However, the notional amounts specified in credit default swap agreements where the Company has sold credit protection represent the maximum amount of potential loss, assuming no recoveries.

17. Sale, Transfer and Servicing of Financial Assets and Extinguishments of Liabilities

B. Transfer and Servicing of Financial Assets

2. The Company did not enter into agreements to service assets or liabilities.
4. The Company was not a transferor or transferee with respect to securitizations and asset-backed financing arrangements.

C. Wash Sales

1. In the course of managing the investment portfolio, securities may be sold and reacquired within 30 days of the sale date in order to enhance the portfolio's yield.
2. The details of securities with an NAIC designation of 3 or below, and those without an NAIC designation, which were sold during the first quarter of 2017 and 2016, and reacquired within 30 days of the sale date were as follows:

Description	2017

20. Fair Value Measurements

- A. Fair value is defined, per SSAP No. 100, *Fair Value* ("SSAP No. 100"), as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. SSAP No. 100 identified three valuation techniques which are used, either independently or in combination, to determine fair value: (1) market approach; (2) income approach; and (3) cost approach. SSAP No. 100 also contains guidance about observable and unobservable inputs, which are assumptions that market participants would use in pricing an asset or liability. To increase consistency and comparability in fair value measurements, the fair value hierarchy prioritizes the inputs to valuation techniques into three broad levels: 1, 2 and 3. The hierarchy for inputs used in determining fair value maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available.

The Company has two types of situations where investments are classified as Level 3. The first is where specific inputs significant to the fair value estimation models are not market observable. This primarily occurs in the Company's use of broker quotes to value certain securities where the inputs have not been corroborated to be market observable, and the use of valuation models that use significant non-market observable inputs. The second situation where the Company classifies securities in Level 3 is where quotes continue to be received from independent third-party valuation service providers and all significant inputs are market observable; however, there has been a significant decrease in the volume and level of activity for the asset when compared to normal market activity such that the degree of market observability has declined to a point where categorization as a Level 3 measurement is considered appropriate. The indicators considered in determining whether a significant decrease in the volume and level of activity for a specific asset has occurred include the level of new issuances in the primary market, trading volume in the secondary market, the level of credit spreads over historical levels, applicable bid-ask spreads, and price consensus among market participants and other pricing sources.

There were no transfers into Level 3 in 2017. Transfers into Level 3 during 2016 included situations where a fair value quote was not provided by the Company's independent third-party valuation service provider and as a result the price was stale or had been replaced with a broker quote where the inputs had not been corroborated to be market observable. In addition, transfers into Level 3 during 2016 included situations where there was a change in the NAIC designation that resulted in the asset being reported and measured at fair value.

Transfers out of Level 3 during 2017 included securities measured at lower of cost or market and reported at cost in 2017 and fair value in 2016. Transfers out of Level 3 during 2016 included changes in the NAIC designation that resulted in the asset not being reported and measured at fair value.

3. Transfers between level categorizations may occur due to changes in the availability of market observable inputs, which generally are caused by changes in market conditions such as liquidity, trading volume or bid-ask spreads. Transfers between level categorizations may also occur due to changes in the valuation source. For example, in situations where a fair value quote is not provided by the Company's

NOTES TO FINANCIAL STATEMENTS

independent third-party valuation service provider and as a result, the price is stale or has been replaced with a broker quote whose inputs have not been corroborated to be market observable, the security is transferred into Level 3. Transfers in and out of level categorizations are reported as having occurred at the beginning of the quarter in which the transfer occurred.

4. In determining fair value, the Company principally uses the market approach which generally utilizes market transaction data for the same or similar instruments. To a lesser extent, the Company uses the income approach which involves determining fair values from discounted cash flow methodologies. For the majority of Level 2 and Level 3 valuations, a combination of the market and income approaches is used.

Listed below is a summary of the significant valuation techniques for assets and liabilities measured and reported at fair value.

Level 2 measurements

Bonds - Industrial and miscellaneous bonds consist of corporate bonds, including those that are privately placed and asset-backed securities ("ABS"). The primary inputs to the valuation for public corporate bonds include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Privately placed corporate bonds are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer. The primary inputs to the valuation for ABS include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, prepayment speeds, collateral performance and credit spreads. Certain ABS are valued based on non-binding broker quotes whose inputs have been corroborated to be market observable.

Unaffiliated common stocks - The primary inputs to the valuation include quoted prices or quoted net asset values for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, underlying stock prices and credit spreads.

Derivatives - Free-standing exchange listed derivatives that are not actively traded are valued based on quoted prices for identical instruments in markets that are not active. Over-the-counter derivatives, including interest rate swap and foreign currency swap agreements, certain options and credit default swap agreements, are valued using models that rely on inputs such as interest rate yield curves, currency rates, and counterparty credit spreads that are observable for substantially the full term of the contract. The valuation techniques underlying the models are widely accepted in the financial services industry and do not involve significant judgment.

Separate Accounts - Indexed variable annuity contracts may be supported by corporate bonds, including those that are privately placed. The primary inputs to the valuation for public corporate bonds include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Privately placed corporate bonds are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer. In addition, indexed variable annuity contracts may be supported by exchange listed derivatives that are not actively traded and are valued based on quoted prices for identical instruments in markets that are not active.

Level 3 measurements

Bonds - Industrial and miscellaneous bonds consist of corporate bonds, including those that are privately placed and ABS. Corporate bonds, including those that are privately placed are primarily valued based on non-binding broker quotes where the inputs have not been corroborated to be market observable. ABS are valued based on non-binding broker quotes received from brokers who are familiar with the investments and where the inputs have not been corroborated to be market observable.

Perpetual preferred stocks - The primary inputs to the valuation include non-binding broker quotes where the inputs have not been corroborated to be market observable.

Unaffiliated common stocks - The primary inputs to the valuation include quoted prices or quoted net asset values for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 measurements.

Derivatives - Certain over-the-counter derivatives, such as interest rate cap agreements are valued using models that are widely accepted in the financial services industry. These are categorized as Level 3 as a result of the significance of non-market observable inputs such as volatility. Other primary inputs include interest rate yield curves and credit spreads.

Separate Accounts - Indexed variable annuity contracts are supported by mortgage loans. The fair value of mortgage loans on real estate is based on discounted contractual cash flows or, if the loans are impaired due to credit reasons, the fair value of collateral less costs to sell. Risk adjusted discount rates are selected using current rates at which similar loans would be made to borrowers with similar characteristics using similar types of properties as collateral.

5. All information related to derivatives measured and reported at fair value is presented above.

The fair value of bonds in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of publicly traded bonds in Level 2 is based upon quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Non-publicly traded bonds in Level 2 are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer. The fair value of municipal bonds in Level 3 not rated by third party credit agencies, but receiving an NAIC designation is based on quoted prices for identical or similar assets in markets that exhibit less liquidity relative to those markets supporting Level 2 fair value measurements, contractual cash flows, benchmark yields and credit spreads. The fair value of corporate bonds in Level 3 is primarily based on non-binding broker quotes where the inputs have not been corroborated to be market observable. Other inputs for corporate bonds include an interest rate yield curve, as well as published credit spreads for similar assets that incorporate credit quality and industry sector of the issuer. The fair value of LBASS in Level 2 is primarily based on valuation models utilizing quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, prepayment speeds, collateral performance and credit spreads to determine fair value. The fair value of LBASS in Level 3 is primarily based on non-binding broker quotes received from brokers who are familiar with the investments or internal models with non-market observable inputs.

The fair value of preferred stocks in Level 2 is based on quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, underlying stock prices and credit spreads. The fair value of the preferred stocks in Level 3 is based on the valuation method described in Part A4 of this note.

The fair value of unaffiliated common stocks in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of unaffiliated common stocks in Levels 2 and 3 is based on the valuation methods described in Part A4 of this note.

The fair value of mortgage loans on real estate in Level 3 is based on discounted contractual cash flows, or if the loans are impaired due to credit reasons, the fair value of collateral less costs to sell. Risk adjusted discount rates are selected using current rates at which similar loans would be made to borrowers with similar characteristics, using similar types of properties as collateral.

The fair value of cash equivalents and short-term investments in Level 1 is based on quoted prices or net asset values for identical assets in active markets the Company can access. The fair value of cash equivalents and short-term investments in Level 2 is based on quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. For certain short-term investments, amortized cost is used as the best estimate of fair value. The fair value of short-term investments in Level 3 is primarily based on non-binding broker quotes where the inputs have not been corroborated to be market observable.

The fair value of derivatives in Levels 2 and 3 is based on the valuation methods described in Part A4 of this note. Cash collateral for futures contracts is also included in the derivatives line and the fair value, which is included in Level 2, is based on carrying value due to its short-term nature.

NOTES TO FINANCIAL STATEMENTS

The fair value of LIHTC property investments in Level 3 is based on amortized cost, using the proportional amortization method, which approximates fair value.

The fair value of unaffiliated surplus notes in Level 2 is based upon quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. The fair value of unaffiliated surplus notes in Level 3 is based on discounted cash flow calculations using current interest rates for instruments with comparable terms.

The fair value of collateral loans in Level 3 is based on discounted cash flow calculations using current interest rates for instruments with comparable terms.

The fair value of reinvested collateral from securities lending and collateral related to derivatives in Level 2 is based on carrying value due to its short-term nature.

The fair value of the assets of the Separate Accounts in Level 1 is based on actively traded mutual funds that have daily quoted net asset values for identical assets the Company can access. The fair value of the assets of the Separate Accounts in Levels 2 and 3 is based on the valuation methods described in Part A4.

Financial liabilities

Presented below are the aggregate fair value estimates and statement values of financial instruments:

March 31, 2017							
Type of Financial Instrument	Aggregate Fair Value	Statement Value	(Level 1)	(Level 2)	(Level 3)	Not Practicable (Carrying Value)

Derivative collateral	\$ 5	\$ 5	\$ -	\$ 5	\$ -	\$ -	\$ -
Separate Accounts - Derivatives	\$ 7	\$ 7	\$ -	\$ 7	\$ -	\$ -	\$ -

The fair value of the liability for deposit-type contracts is generally based on the terms of the underlying contracts incorporating current market-based crediting rates for similar contracts that reflect the Company's own credit risk. Immediate annuities without life contingencies and fixed rate funding agreements are valued at the present value of future benefits using current market-based implied interest rates and reflect the Company's own credit risk. Fixed annuities were valued at the account value less surrender charges.

The fair value of the liabilities for collateral related to securities lending and derivatives in Level 2 is based on carrying value due to its short-term nature.

The fair value of derivatives in Level 2 is based on the valuation methods described in Part A4 of this note.

External Reserve Financing Transaction

The Company, through its wholly-owned captive subsidiary, ALIC Re, entered into an external reserve financing arrangement which replaced the existing \$325 million affiliated surplus note arrangement. The external financing resulted in increasing ALIC Re's surplus note capacity to accommodate the expansion of the existing reinsurance agreement effected contemporaneously. The refinancing was comprised of transactions as follows:

Effective January 1, 2017, the Company and ALIC Re entered into the Amended and Restated Reinsurance Agreement ("Amended Reinsurance Agreement"). The original reinsurance agreement included guaranteed term business written by the Company and former wholly-owned subsidiary Lincoln Benefit Life Company ("LBL"), in 2000 through 2009. The Amended Reinsurance Agreement expanded the covered business to include guaranteed term business assumed by the Company and written by LBL and Allstate Assurance Company ("AAC"), an affiliate, with issue years 2010 through 2017. The LBL and AAC businesses were ceded to the Company and retroceded to ALIC Re. Upon implementation of the Amended Reinsurance Agreement with ALIC Re, the Company recorded a net after-tax benefit to income of \$563 million resulting from the reinsurance of premiums, death benefits, increase in aggregate reserves and increase in loading on deferred and uncollected premiums of \$288 million; \$18 million; \$826 million and \$7 million, respectively ceded from the Company to ALIC Re. In addition, the agreement also amended as of the effective date the experience rated refund formula to utilize Actuarial Guideline XLVIII ("AG48") reserves and added additional conditions for experience rated refund payments, including an explicit holdback of \$150 million to fund future income tax payments by ALIC Re which will become payable when future income is earned on the business. The results of the revised calculation generated an increase of \$292 million in pretax net income. The experience rated refund was received by the Company from ALIC Re in March 2017. As a result of the expanded reinsurance transaction, the Company recognized a tax expense of \$292 million on the taxable reinsurance gain of ceding the excess XXX reserves. On March 14, 2017, the Company borrowed from the Corporation under the Liquidity Agreement \$311 million to fund the reciprocal tax benefit of ALIC Re associated with the January 1, 2017 transactions as well as ALIC Re's 2016 losses. This amount was paid to ALIC Re on March 15, 2017 as permitted under the tax sharing agreement.

Also effective January 1, 2017, ALIC Re entered into a Master Transaction Agreement ("MTA") with Bueller Financing LLC ("Bueller"), an external financing provider. In accordance with the MTA, Bueller issued a variable funding puttable note also referred to as a credit-linked note ("CLN") in the amount of \$1.22 billion. The CLN amount is calculated as and will vary with the Commissioners Reserve Valuation Method ("CRVM") reserves on the reinsured business in excess of the AG48 reserves, up to a maximum value of \$1.75 billion. The CLN is held in a trust in compliance with AG48. A permitted practice to recognize the CLN as an admitted asset on ALIC Re has been approved by the SC DOI. ALIC Re earned accredited reinsurer status in the State of Illinois and the IL DOI has approved via acceptance the CLN as Other Security as defined in AG48.

NOTES TO FINANCIAL STATEMENTS

The SC DOI approved the redemption of affiliated surplus notes issued by ALIC Re to the Company with a par value of \$325 million effective January 1, 2017. The surplus notes were redeemed at par plus \$1 million of accrued interest through a transfer of cash and fair value of investments in the amount of \$326 million. Upon repayment of the surplus notes from ALIC Re, the intercompany note agreement between the Company and Kennett Capital, in the amount of \$325 million par was terminated, including settlement of \$1 million of accrued interest received by the Company.

Effective January 1, 2017, the Company entered into a coinsurance agreement with AAC for guaranteed term business issued by AAC in 2015 through 2017. Cash in the amount of \$20 million was transferred from AAC to the Company in January 2017 in settlement of the agreement. Net business related liabilities transferred to the Company were \$36 million, after-tax. On effecting the reinsurance agreement, the Company recognized a loss in net income of \$5 million after tax and a loss in surplus of \$9 million.

22. Events Subsequent

An evaluation of subsequent events was made through May 10, 2017 for the Quarterly Statement issued on May 12, 2017. There were no significant subsequent events requiring adjustment to or disclosure in the financial statements.

24. Retrospectively Rated Contracts and Contracts Subject to Redetermination

E. Risk Sharing Provisions of the Affordable Care Act (“ACA”)

The accident and health insurance premiums and claims reported by the Company are for products not subject to the ACA’s risk sharing provisions.

25. Change in Incurred Losses and Loss Adjustment Expenses

For accident and health insurance products within the Company’s book of business, the changes in the provision for incurred losses and loss adjustment expenses attributable to insured events of prior years were immaterial in 2017 and 2016. The Company did not accrue additional premiums or return premiums related to the prior-year effects in 2017 or 2016.

33. Premiums and Annuity Considerations Deferred and Uncollected

Deferred and uncollected life insurance premiums and annuity considerations, net of reinsurance, were as follows:
