

# Accountancy & Finance Careers

## Anna Hegarty

### What does an Allstate Financial Analyst do?

Analysis, manipulation and interpretation of data to prepare reports for senior management. Work towards improving the efficiency and usefulness of processes and reporting in my role.

### Where do you work?

Allstate NI Belfast in the Investments Finance team.

### What interests you most at work?

Right from the interview process it was clear that the atmosphere in Allstate NI is one where you can enjoy work and be yourself. There are social events every month and endless opportunities to get involved in charity work and other events. The benefits on offer include flexible working, casual dress, health insurance, employee recognition program and a sports and social committee, amongst many others.

### To you, how does the 'Opportunity of a lifetime' apply to working at Allstate?

Being part of the largest publicly held personal lines property and casualty insurer in America the opportunities are endless. Within my first three months I have already travelled to the US twice for training. Whilst in Chicago I had so many new experiences including going to baseball, basketball, attending a Thanksgiving lunch, a day at the races and exploring downtown Chicago.

### What's one thing people would be surprised to learn about you?

I was once in a (terrible) movie with James Nesbitt.

### What's the best piece of advice you've received?

Only you can change your life, no one else can do it for you.
